Pune, Maharashtra

SUMMARY

Full Stack Developer (MERN) with production experience shipping role-based enterprise features — REST APIs, JWT authentication, and RBAC — for an 8-member Agile team. Built and deployed two live full-stack applications end-to-end using React.js, Node.js, Express.js, and MySQL. Final-year MCA candidate seeking a full-time Full Stack Developer role to own features from design through deployment.

EDUCATION

Savitribai Phule Pune University — Master of Computer Applications (MCA) 2024 – 2026

Currently Pursuing | Pune, Maharashtra

Shivaji University, Kolhapur — Bachelor of Computer Science (BCS) | Score: 76.07% 2021 – 2024

Kolhapur, Maharashtra

Jaysingpur College, Jaysingpur — Higher Secondary Certificate (HSC) | Score: 71.00% 2019 – 2021

Jaysingpur, Maharashtra

WORK EXPERIENCE

Intelligic Software Pvt. Ltd., Pune — Software Developer Intern

Nov 2025 – Apr 2026

Pune, Maharashtra

- Owned end-to-end development of 5+ modules in a role-based QC Management System, building responsive UI with React.js (Hooks, Context API), HTML5, CSS3, and Bootstrap, backed by Node.js/Express.js services on MySQL.
- Designed and shipped RESTful APIs powering report management, QC data handling, and role-based workflows, enabling reliable frontend-backend integration across 5+ modules used by three distinct user roles.
- Implemented JWT-based authentication and RBAC governing separate Admin, Supervisor, and Floor Worker permission levels, securing access across the entire application.
- Automated PDF report generation and drove API testing/debugging in Postman, catching integration issues before release and improving data accuracy across QC workflows.
- Partnered with an 8-member cross-functional Agile team — daily stand-ups, sprint planning, peer code reviews — consistently delivering assigned features on schedule.

PROJECTS

QC Management System / React.js, Node.js, Express.js, MySQL

Live: qc-management-84qp.onrender.com | GitHub: github.com/ajinkyapatil55/qc-management-system

- Engineered a full-stack QC Management System tracking manufacturing inspections, employee-wise QC reports, and defect records for React.js (JavaScript ES6+, Hooks, Context API) frontends and Node.js/Express.js/MySQL backend.
- Built role-based authentication and authorization for Admin, Supervisor, and Floor Worker users using JWT and RBAC, enforcing least-privilege access across every module.
- Designed responsive dashboards (HTML5, CSS3, Bootstrap) for employee-wise report filtering and defect analysis with bar charts, line graphs, and pie charts, improving reporting visibility for supervisors.
- Designed RESTful APIs for QC reports, inspection quantity, rejected quantity, and defect tracking modules.
- Optimized MySQL queries using JOIN operations across the report pipeline, cutting redundant round-trips and speeding up report data retrieval.

Online Electronic Shop / React.js, Node.js, Express.js, MySQL

Live: electronic-shop-lnk7.onrender.com | GitHub: github.com/ajinkyapatil55/Electronic-Shop

- Engineered a full-stack, fully responsive e-commerce platform (React.js, Node.js, Express.js, MySQL) covering product, cart, and order management end-to-end.
- Built product listing, shopping cart, and category-based browsing with a responsive UI (HTML5, CSS3, Bootstrap) optimized for both mobile and desktop.

- Implemented SMTP-based automated email notifications (Nodemailer) for order confirmation and delivery status verification, improving post-purchase customer communication.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications on order updates, boosting user engagement.
- Built RESTful APIs with CRUD operations for product, cart, and order management.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, React Hooks, Context API, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC

Database: MySQL, MongoDB, PostgreSQL, SQL Joins, Query Optimization

Tools: Git, GitHub, Postman, npm, Debugging, API Testing

Concepts: CRUD Operations, MVC Architecture, OOP, Data Structures, SDLC

Methodologies: Agile, Scrum

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Certified: AI Fundamentals (AI-900) — Core AI concepts, Machine Learning models, Responsible AI practices, and Azure AI services.
- MERN Stack Development — Full-stack certification via Apna College; covered React.js, Node.js, Express.js, MySQL, MongoDB, REST APIs, and deployment.

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi

Strengths: Problem Solving, Quick Adaptability, Team Collaboration, Leadership
